Sample Questions to Ask the Teacher:

- What does my child seem to be the most interested in at school?
- Does my child have good friends in class and at school?
- What is the most important thing that I can be doing to prepare my child for high school?
- Does my child have good friends in class and at school?
- What could my child be doing that he or she is not already doing?
- What is the most important thing that I can be doing to prepare my child for high school?
- Does my child have good friends in class and at school?
- What could my child be doing that he or she is not already doing?
- What is the most important thing that I can be doing to prepare my child for high school?

Mathematics

- Have your child find numbers in everyday life and categorize the numbers as rational numbers, whole numbers, integers, etc.
- Have your child predict the number of times an outcome in an experiment will occur if it is repeated 200 times using both theoretical and experimental probabilities and compare the results.
- Give your child a starting point and a rate of change, such as a starting point 2 feet away moving at 15 feet per minute. Have your child write the equation for the situation in y = mx + b form. Then, give your child a finishing distance and have her write and solve the equation.
- Have your child measure the dimensions for three to four rooms and create a scale drawing of the rooms given a certain scale factor.
- Have your child research the ways that we as a civilization discovered the number pi.
- Have your child create a circle graph for data collected from a survey, such as the type of vehicles seen in a parking lot.
- Have your child create a budget with a given amount of money and ask him to calculate the percentage for the different categories.
